NAME

archive_read_add_passphrase, archive_read_set_passphrase_callback — functions
for reading encrypted archives

LIBRARY

Streaming Archive Library (libarchive, -larchive)

SYNOPSIS

DESCRIPTION

archive_read_add_passphrase()

Register passphrases for reading an encryption archive. If passphrase is NULL or empty, this function will do nothing and **ARCHIVE_FAILED** will be returned. Otherwise, **ARCHIVE_OK** will be returned.

${\tt archive_read_set_passphrase_callback}()$

Register a callback function that will be invoked to get a passphrase for decryption after trying all the passphrases registered by the **archive_read_add_passphrase**() function failed.
